ABSTRACTED-PUB-NO: DE 19851426A

BASIC-ABSTRACT:

NOVELTY - Producing multiphase, shaped detergents or washing agents comprises covering shaped premix with melt-emulsion or -suspension of covering material containing dispersed active materials such as bleaches to give controlled release in use.

DETAILED DESCRIPTION - Production of a multiphase, shaped detergent or washing agent comprises:

pressing a particulate pre-mix to form a shape with a hollow, preparing a melt-suspension or -emulsion containing a covering material of melting point above 30 deg. C having active material(s) dispersed in it; filling the shape with the composition prepared in (ii) at above the melting point of the covering material; and cooling and optionally post-treating the agent.

USE - The agent can be used for machine washing of textiles or dishes, as a bleaching- or water-softening-agent or in tablet form for stain removal.

ADVANTAGE - The agents give controlled release of actives such as bleaches, perfumes or enzymes at predetermined points in the washing cycle while still having good storage and transportation stability and a higher efficiency for a range of uses than prior-art products. This is achieved while retaining the maximum possible freedom in the choice of ingredients for the agents.

ABSTRACTED-PUB-NO: EP 1095130B

EQUIVALENT-ABSTRACTS:

NOVELTY - Producing multiphase, shaped detergents or washing agents comprises covering shaped premix with melt-emulsion or -suspension of covering material containing dispersed active materials such as bleaches to give controlled release in use.

DETAILED DESCRIPTION - Production of a multiphase, shaped detergent or washing agent comprises:

pressing a particulate pre-mix to form a shape with a hollow, preparing a melt-suspension or -emulsion containing a covering material of melting point above 30 deg. C having active material(s) dispersed in it; filling the shape with the composition prepared in (ii) at above the melting point of the covering material; and cooling and optionally post-treating the agent.

USE - The agent can be used for machine washing of textiles or dishes, as a bleaching- or water-softening-agent or in tablet form for stain removal.

ADVANTAGE - The agents give controlled release of actives such as bleaches, perfumes or enzymes at predetermined points in the washing cycle while still having good storage and transportation stability and a higher efficiency for a range of uses than prior-art products. This is achieved while retaining the maximum possible freedom in the choice of ingredients for the agents.
